(54) Title: **DISPENSER**

(57) **Abstract:** A portable device for dispensing a fragrance comprising a housing (1) containing a fragrance element (3) and at least one aperture (5) in a side of the housing (1) in the vicinity of one end (6) of the housing to release fragrance from the housing (1). A lid is attached to the housing (1) to selectively open and close the aperture (5). The one end (6) of the device is shaped to abut the lower end of a users nose such that in use the fragrance can be inhaled through the aperture (5) to the nasal passage of the user.
